Summary (of sorts) for τ sector

- NO MAJOR DISCREPANCIES
- NO BURNING ISSUES
- NO CONVINCING PHYSICS CASE FOR MAJOR NEW FACILITIES *
- NO SERIOUS HINTS OF "NEW" PHYSICS OR PARTICULARLY SENSITIVE APPROACHES

BUT

- LOTS OF GOOD, SOLID PHYSICS TO BE DONE AT EXISTING AND PROPOSED FACILITIES
- CRUCIAL NEED FOR LARGE COLLABORATIONS TO MAINTAIN τ WORKING GROUPS OF "CRITICAL MASS"

* SOME BASIC PARAMETERS AND A NUMBER OF PEOPLE WOULD LIKE A "TRUE" τ-C FACTORY (BEPC-2 ??)
